Physical Plant

<p>Number of buildings:</p> <p>Auditors should count all buildings that are part of the facility, whether residents are formally allowed to enter them or not. In situations where temporary structures have been erected (e.g., tents) the auditor should use their discretion to determine whether to include the structure in the overall count of buildings. As a general rule, if a temporary structure is regularly or routinely used to hold or house residents, or if the temporary structure is used to house or support operational functions for more than a short period of time (e.g., an emergency situation), it should be included in the overall count of buildings.</p>	1
<p>Number of resident housing units:</p> <p>Enter 0 if the facility does not have discrete housing units. DOJ PREA Working Group FAQ on the definition of a housing unit: How is a "housing unit" defined for the purposes of the PREA Standards? The question has been raised in particular as it relates to facilities that have adjacent or interconnected units. The most common concept of a housing unit is architectural. The generally agreed-upon definition is a space that is enclosed by physical barriers accessed through one or more doors of various types, including commercial-grade swing doors, steel sliding doors, interlocking sally port doors, etc. In addition to the primary entrance and exit, additional doors are often included to meet life safety codes. The unit contains sleeping space, sanitary facilities (including toilets, lavatories, and showers), and a dayroom or leisure space in differing configurations. Many facilities are designed with modules or pods clustered around a control room. This multiple-pod design provides the facility with certain staff efficiencies and economies of scale. At the same time, the design affords the flexibility to separately house residents of differing security levels, or who are grouped by some other operational or service scheme. Generally, the control room is enclosed by security glass, and in some cases, this allows residents to see into neighboring pods. However, observation from one unit to another is usually limited by angled site lines. In some cases, the facility has prevented this entirely by installing one-way glass. Both the architectural design and functional use of these multiple pods indicate that they are managed as distinct housing units.</p>	27

<p>Number of multiple occupancy cells, rooms, or other enclosures:</p>	8

Summary of Audit Findings

The Prison Rape Elimination Act (PREA) on-site audit of the Wisconsin Community Services' (WCS) Parson Glover House Federal Residential Reentry Centers was conducted on April 21, 2022, by the Department of Justice Certified PREA Auditor Anthony Dodd Sr., (The Dodd Group, LLC). The pre-audit preparation included a thorough review of all documentation, reports, records, and materials submitted by the facility, along with data included in the completed Pre-Audit Questionnaire. The Pre-Audit Questionnaire was delivered via a thumb drive by the agency's PREA Coordinator. The Questionnaire was completed in its entirety. The PREA Coordinator also provided this auditor with itemized PREA Standards, and the steps the agency has taken to be in compliance with each standard. The documentation reviewed included agency's policies, procedures, forms, minutes of meetings, education/training materials, organizational charts, posters, brochures, rosters and other PREA related materials that were provided to demonstrate compliance with the PREA standards. The auditor was available when needed to provide guidance and assistance before the on-site audit.

The agency reported in the past 12 months that the Parson House did not have any allegations of sexual abuse and sexual harassment that were received in the past 12 months.

The residents interviewed appeared to understand their right to be free from sexual abuse and harassment. Residents received literature at intake that provides information regarding sexual abuse and how to report it. Residents are also shown a 15 minute, PREA orientation video that explains in depth the multiple ways of how to report sexual abuse and how to protect themselves from sexual abuse. Residents appeared knowledgeable and expressed that they knew what to do if they ever felt they were being sexually harassed. Residents constantly stated they knew who and how to contact available resources and emotional support, due to the information they were given at intake, and the PREA posters posted in the hallways of the facility.

<p>33. Enter the total number of TARGETED INMATES/RESIDENTS/DETAINEES who were interviewed:</p> <p><i>As stated in the PREA Auditor Handbook, the breakdown of targeted interviews is intended to guide auditors in interviewing the appropriate cross-section of inmates/residents/detainees who are the most vulnerable to sexual abuse and sexual harassment. When completing questions regarding targeted inmate/resident/detainee interviews below, remember that an interview with one inmate/resident/detainee may satisfy multiple targeted interview requirements. These questions are asking about the number of interviews conducted using the targeted inmate/resident/detainee protocols.</i></p> <p><i>For example, if an auditor interviews an inmate who has a physical disability, is being held in segregated housing due to risk of sexual victimization, and disclosed prior sexual victimization, that interview would be included in the totals for each of those questions. Therefore, in most cases, the sum of all the following responses to the targeted inmate/resident/detainee interview categories will exceed the total number of targeted inmates/residents/detainees who were interviewed.</i></p> <p><i>If a particular targeted population is not applicable in the audited facility, enter "0".</i></p>	<p>1</p>

Documentation Sampling

Where there is a collection of records to review—such as staff, contractor, and volunteer training records; background check records; supervisory rounds logs; risk screening and intake processing records; inmate education records; medical files; and investigative files—auditors must self-select for review a representative sample of each type of record.

65. In addition to the proof documentation selected by the agency or facility and provided to you, did you also conduct an auditor-selected sampling of documentation?

Yes No

66. Provide any additional comments regarding selecting additional documentation (e.g., any documentation you oversampled, barriers to selecting additional documentation, etc.).

Note: as this text will be included in the audit report, please do not include any personally identifiable information or other information that could compromise the confidentiality of any persons in the facility.

- Does Not Meet Standard (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The facility administrators provided documentation of their staffing schedule. In incidents where the staffing plan was not met, the facility provided justifiable deviations from the plan such as resident population decrease, sick staff, training, funeral leave, home/work site visit, and vacation. **However, during interviews with staff and residents there was a glaring lack of physical inspection for the female housing units due to, as explained, no female resident monitor available. Male staff at this facility, indicated that they do not tour or inspect the female housing units due to liability and allegation concerns. This is very concerning to this auditor regarding male staff not understanding that security of all, male and female residents, are their priority. This facility must find a solution to this issue.**

Corrective Active for the above was completed and the following has been adhered to: Male staff are required to conduct security inspections within female housing units. All staff are required to document each inspection in the SecurManage shift log (their database). Also, by scanning the QR code which are located in the inside of all units, including female. Supervisors are required to review the QR scan reports to ensure inspections are being completed.

The agency does have a policy that discusses reassessment of the staffing plan based on the physical layout of each facility, and the composition of the resident population would be reviewed at least once per year. The policy includes the PREA Compliance Manager at each facility to document rational decisions regarding staffing plans levels, staffing patterns, and video monitoring systems.

The facility has updated their video monitoring system to include color instead of black and white that was previous. The video monitoring system is able to record and playback of footage of up to 40 days before the data is purged.

Standard 115.215: Limits to cross-gender viewing and searches

All Yes/No Questions Must Be Answered by the Auditor to Complete the Report

 Yes No

115.215 (b)

- Does the facility always refrain from conducting cross-gender pat-down searches of female residents, except in exigent circumstances? (N/A if the facility does not have female residents.)
 Yes No NA
- Does the facility always refrain from restricting female residents' access to regularly available programming or other outside opportunities in order to comply with this provision? (N/A if the facility does not have female residents.) Yes No NA

115.215 (c)

- Does the facility document all cross-gender strip searches and cross-gender visual body cavity searches? Yes No
- Does the facility document all cross-gender pat-down searches of female residents? (N/A if the facility does not have female residents). Yes No NA

115.215 (d)

- Does the facility have policies that enable residents to shower, perform bodily functions, and change clothing without nonmedical staff of the opposite gender viewing their breasts, buttocks, or genitalia, except in exigent circumstances or when such viewing is incidental to routine cell checks? Yes No

The agency does not provide medical care on site, however if medical care is needed as it relates to sexual abuse, the agency has a policy in place to transport residents to the Sexual Assault Treatment Center (SATC) who has trained medical and mental health care professionals. Instructions for Overall Compliance Determination Narrative

The agency policy requires that all residents have an initial needs assessment/screening performed by a Case Manager within 72 hours of entering the facility. The agency uses an objective screening tool that assesses a resident's risk for sexual victimization and abusiveness by assessing whether the resident has a mental, physical, or developmental disability, the age of the resident, the physical build of the resident, whether the resident has been previous incarcerated, criminal history, prior convictions of sex offenses, whether the resident is gay, lesbian, bisexual, transgender, intersex or gender non-conforming, previous sexual victimization experience, and resident's own perception of vulnerability.

Upon inspection all Case Managers' file cabinets were locked and secured with confidential information. PREA assessments forms were viewed and consistent with all resident/staff interviews. If a resident is identified as being a potentially victim or aggressor of sexual abuse or sexual harassment the facility place that individual close by the staff office in a separate unit. All residents' interviews consistently stated that the Parsons House does their screening and assessments upon arrival in a thorough manner. All residents indicated that the Parsons House goes upon and beyond to ensure their safety from aggressors upon entry.

Instructions for Overall Compliance Determination Narrative

The agency provides residents multiple internal ways to report sexual abuse and sexual harassment, retaliation, and staff misconduct. Residents receive education regarding reporting at intake and orientation. The reporting methods include verbally relaying the allegation to a staff member, contractor, volunteer or PREA Compliance Manager; calling 911 if necessary, submitting a written grievance, having a third-party submit an oral or written complaint on behalf of the resident. Residents are educated they can file a report of sexual abuse or sexual harassment on behalf of another resident.

Residents are allowed to have certain cellphones in the facility, allowing residents more avenues to report any sexual abuse privately. Residents also have access to pay phones within the facility with information of them on how to report sexual abuse or sexual harassment to an outside entity such as the Bureau of Prisons, Dept. of Corrections, Milwaukee Police Department, and Sexual Assault Treatment Center.

Interviews of residents indicated they had a comprehensive knowledge of the avenues that are available to them to report sexual abuse and sexual harassment. All residents interviewed expressed a knowledge of the grievance process and understood reports can be made anonymous upon request.

Instructions for Overall Compliance Determination Narrative

The agency's annual report of incident-based data of sexual abuse has been generated for the facility and readily available to the public on the agency's website. The agency's website provides information on PREA Standards for Community Confinement and PREA data in Wisconsin.

The facility administrators are facilitating discussions regarding the prevention and detection of sexual abuse and sexual harassment. Through data review and discussions of improvements, the agency

added color video cameras instead of the black and white cameras based on these conversations. The agency also added QR scanners on housing units and resident ID bands for more security and accountability.
